

Grocery Store Assessments

Shopping Summative

Standards:

Standard 4: Students will be able to calculate the cost of up to three items.

Standard 5: Students will be able to utilize next dollar to pay for items they are purchasing.

Standard 6: Students will be able to identify if they have enough money to pay for an item or not.

Task:

The students will go to the grocery store with a shopping list of three items and a twenty-dollar bill. They will locate each item that is on the list and write down the price of the item. Next, they will use the dollar up method and write that total down. When they have found the three items and their prices they will utilize their calculator to add up the prices. They will then tell the teacher whether or not they are able to pay for these items with the twenty-dollar bill.

****If the student is unable to do a step after prompting, the teacher will provide the answer and have them move to the next step. (e.g., if they can't find an item on the list after prompting, the teacher will show the student where it is)**

Rubric:

Criteria	Beginner (1)	Developing (2)	Mastery (3)	Weighting
Locate the items on the list	Could not locate the item		Located the item	
Found and wrote down the price of each item	Did not find the correct prices for any of the items	Found the correct price for 1-2 of the items	Found the correct price of all of the items.	
Dollar Up	Did not correctly dollar up any of the items.	Correctly utilized the dollar up method 1 – 2 of the items correctly	Correctly utilized the dollar up method all of the items correctly	X3
Add up the three items correctly	Did not calculate the items correctly after 2 attempts	Calculated the items correctly on the second attempt	Calculated the items correctly on the first attempt	X3
Identify if they have enough money	Did not correctly identified that they had enough money		Correctly identified that they had enough money	X2
