

Task 3: Recipe Shopping List

Standards:

Standard 2: Students will be able to label the sections of a grocery store and name items that would be found within those sections.

Standard 3: Students will be able to create a shopping lists from a recipe.

Task:

The students will be given a recipe that we use in class during our cooking activities. The recipes will all have ten ingredients. The student will have to locate the list of ingredients in the recipe. Once they have found them, they will either write or type the list on to a shopping list worksheet. If they are typing this, they will use notability and the worksheet will already be uploaded. Once they have their list, they will go in to the kitchen and see if we have any of the items on the list. If they find an item we already have they will cross it off the list. The teacher should make sure that there are only three items in the kitchen that are on the recipe. When they are finished they will get the worksheet that is broken up in to grocery sections. The student will then write the items they have not crossed off in the correct section that it can be found at the grocery store.

****If the student is unable to do a step after prompting, the teacher will provide the answer and have them move to the next step. (e.g., if they can't find the ingredients even after prompting, the teacher will show the student where it is)**

Rubrics:

Criteria	Beginner (1)	Developing (2)	Mastery (3)
Locate the ingredients in the recipe.	Cannot locate the ingredients	Located the ingredients after prompting	Located the ingredients independently
Copy the list of ingredients on to the worksheet	Copied 50% or less items correctly	Copied 80% -50% of the items correctly	Copied 80% or higher of the items correctly
Cross of items we already have	Did not cross anything off	Crossed off 1-2 items that were already in the kitchen	Crossed off all of the items that were already in the kitchen
Rewrites the items need on the shopping list	Rewrites 0 - 3 of the items needed on the final shopping list	Rewrites 4 - 5 of the items needed on the final shopping list	Rewrites 6 - 7 of the items needed on the final shopping list
Placed items in the correct grocery section	Placed 0 – 3 of the items in the correct grocery section	Placed 4 - 5 of the items in the correct grocery section	Placed 6 - 7 of the items in the correct grocery section
