Final Project

Title: *What did they really say? An Authentic Assessment project based upon Primary Source Analysis for the Advanced Placement and World Studies Program.*

The tasks will be adjusted to the appropriate level when applied.

This year long assessment project grew out of the need to establish an Authentic Assessment within the Advanced Placement and World Studies programs. The author believes that it will provide a framework for the improvement of the higher order/critical thinking skills, which have not been a major focus in previous years.

Goals:

- A)** To develop an informed student who is capable to think critically and in an independent fashion.
- B)** Students will demonstrate intellectual reasoning, reflection and research skill through the use of primary source materials.
