OVERVIEW OF UNITS

Advanced Placement United States History is one of the most difficult classes that students can take in their high school years. It requires students to delve deeply into 400 plus years of history as well as develop skills along the way. There are three units included in this project that cover the first semester of A.P. U.S. History. In addition to standards and tasks for the three units, there are process standards that address skills students work on throughout the year as well as universal standards that are consistently addressed throughout the course of the year. There are tasks included for each set of standards that challenge students to apply their knowledge and dig deeper into the complexities of American History.
