

Overview of Culture Project

The purpose of this project is to provide an overview of Ancient Roman culture. In Latin class, we get so carried away with teaching the grammar that we forget the most interesting aspects of Latin, which are culture and mythology. Therefore, I designed this project as a way for students to learn more about this culture that is very present in the world today. Also, this project will help students learn how to conduct research on a historical topic. Students can choose one of the six culture topics and do guided research based on the questions given. On the day the project is due, students will present their topic. The ultimate goal of the project is to teach the most important aspects of Roman history while teaching students how to conduct research.
