

What does it take?

A look at post-secondary options

Standard

Students will identify the criteria to obtain various careers.
Students will reflect by making connections to themselves.

Task

Using www.careercruising.com with the two careers you choose during the last task, you will need to identify what requirements it will take for you to obtain those jobs. List any schooling, degrees, trainings, or other requirements that are needed in order to be able to have each career. Once you have listed these requirements, follow the questions to write a reflection on the information that you found.

Reflection Questions:

- What connections can you make between the requirements of the careers and your interests and abilities?
- Were you surprised by any of the requirements for either of the careers?
- With this new information, has your perception changed about either of these careers?
- What are you most concerned about when pursuing these careers?

Rubric

Criteria	Excellent -3	Satisfactory -2	Unsatisfactory -1
Identified requirements of each career	Identified all requirements for both careers	Identified some requirements of both careers	Did not identify requirements for one or both careers
Making connections	Many connections were made between the careers and the student's interests and abilities	Few connections were made between the careers and the student's interests and abilities	No connections were made between the careers and the student's interests and abilities
Overall reflection	Reflection contained well-constructed and thoughtful answers to reflection questions	Reflection contained answers to reflection questions	Reflection contained incomplete answers or no answers to reflection question
