

Task 2 – Non-verbal Communication/Movie Clip

Description of Task: Students will have already discussed the value of non-verbal communication such as gestures, facial expression, etc. in being able to accurately understand another when you can't hear or understand the language they are speaking. They will watch a short clip of the movie *Shogun* and answer questions based on what they see. They will hopefully be amazed at how much they know without hearing any of the movie. I chose this movie because probably few students have seen it before.

Standards Addressed: #7

Criteria:

- student's answers are detailed and show effort
- student's answers are accurate or could be based on information available

	0 points	15 points	45 points	75 points
Detail of answers	Not done	X	Student's answers are very brief, using only one or two words or a short sentence for each.	Student's answers are very detailed. Uses several sentences for each question.
Accuracy	Unclear how student came to that conclusion.	Occasionally answers show understanding of events.	Many answers are correct or could be correct based on information provided.	At least 90% of answers are correct or could be based on information provided.
